

IAN KYLE FELIX. MAGHINAY

System Developer / Web Developer

Cabangan, Zambales

Email: iankyle1717@gmail.com

Phone: 09695202982

PROFESSIONAL SUMMARY

Full-stack developer focused on enterprise systems, engineering management platforms, and responsive web applications using .NET technologies. Experienced in building paperless workflow systems, machine monitoring solutions, database-driven applications, and modern UI/UX interfaces using Bootstrap, Tailwind CSS, React, and Node.js.

TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript, React, Bootstrap, Tailwind CSS
Backend	C#, VB.NET, ASP.NET MVC, .NET Core API, Node.js, WinForms
Database	SQL Server, SSMS, Stored Procedures, Database Design
Tools	Visual Studio, VS Code, GitHub, REST API

PROFESSIONAL EXPERIENCE

Production Engineer / Full-Stack System Developer (2025 - 2026)

Sanyo Denki Philippines

- Developed and maintained enterprise workflow systems and machine monitoring applications.
- Built Engineering Management System (EMS) for paperless operations and workflow automation.
- Optimized SQL Server databases and reporting systems.

Computer Programming Teacher (2024)

MACSAT Inc.

- Instructed students in programming fundamentals, C#, CRUD operations, and web development.

Guest Speaker (2025)

PRMSU Iba Campus

- Conducted technical seminar about C# development and CRUD operations.

PROJECTS

Engineering Management System (EMS)

Enterprise web-based platform designed for engineering and production management.

Features:

- Machine Monitoring
- Weekly Recording
- Trouble Handling
- Engineering Reports
- Fabrication Monitoring
- Preventive Maintenance
- Inventory Tracking
- Workflow Automation
- Paperless Operations

ACHIEVEMENTS

- Technical Speaker for C# and CRUD Operations seminar.
- Successfully digitized engineering workflow processes using EMS platform.
- Built responsive enterprise systems with modern UI/UX architecture.
